Join the Live Green Business Partnership

About the Program

Business, Community, and City leaders made it a priority to become a leading sustainable city. A top 25 Sustainable City. With the help of Leadership Franklin, Franklin Tomorrow, members of the community, and the Sustainability Commission and Task Force, a volunteer program to acknowledge businesses that are operating more sustainably has been established.

How Does it Work?

A list of sustainability standards have been developed as indicated on the checklist. Each item is worth a designated number of points. Each business must implement at least 20 points worth of initiatives to qualify for the partner level. As such, the more sustainable you are, the higher level of certification you can achieve, with Platinum being the highest. Window decals will be issued to participating businesses and awards signed by the Mayor and the Chair of the Sustainability Commission will be issued.

How can your Business Benefit?

“Green businesses are more efficient, more competitive, more profitable -- 15% more profitable.”
--Terrashares.com

- Cost Savings
- Market Exposure through the City’s website, a green business directory, and also decals that can be prominently displayed in windows indicating participation
- Healthy Work Environment
